

## CANDLE INFO, TIPS AND SAFETY

My candles are made using natural soy wax and scented with the highest quality fragrance oils. No colour is added. The wicks are made from braided cotton and coated in wax.

To enjoy your candles at their best follow these three simple rules:

- ALWAYS trim the wick to around ½ inch (approx 6mm) each time you burn your candle.
- The first time you light your candle allow it to burn until a melt pool extends the width of the container.
- Extinguish the flame by dunking the wick into the melt pool and then straightening it. This eliminates smoke and also primes the wick with extra wax ready for the next burn.

When burning candles please exercise caution and common sense by following these suggestions:

- Keep your candle out of drafts and away from any combustible materials like curtains and furniture.
- NEVER leave a candle burning unattended.
- Keep your candle out of reach of children and pets.
- Keep the area around the wick free of debris.
- Never burn your candle for longer than 4 hours - when glass gets too hot it can crack.
- Always protect your surfaces by using a flame proof plate under your candle. The lids on my larger candles are perfect for this job.
